**Why do you want to get elected?** (Limit 100 words) In my first term I have been learning how the city operates and determining the nature of the opportunities and problems we face. I would like to see more free events in the park and new concert pavilion, continue the "Team Up to Clean Up" initiative, plan walking/biking trails, create gateway features at city entrances, and implement 2040 Comprehensive Plan. The city needs a regular email newsletter to keep residents informed. All of this should be possible without a tax increase. I will represent all residents and be available to everyone.
