

**NAME: Rashid Malik**  
**PARTY: Democratic**  
**SEEKING: Lieutenant Governor**

**1. Why are you seeking your office?**

I want to help GA grow economically and as a society. We cannot afford to have a fractured society dealing with hate, division and racism. We have a tremendous population crisis and we need everybody to rebuild our country in this civilization of Nanotechnology. Here we should remember that China-India combined has 3 billion consumers and one day when they merge as one common economy, we will be in big trouble. I will help GA to come together as a family and unite so we are productive. I will promote the economic model of "Peace via Trade!" along with "24HoursEduServer.Gov!"

**2. What do you expect to accomplish if elected?**

I will help in reducing income inequalities and thus bring the income level of women to the market value based on the principle of same work, same pay! "Peace via Trade" economic model will increase the wealth of Georgia and the nation. This will free our young talents to contribute to our economy, in the field of research and development. The savings of the nation will contribute to reduce the budget deficit and increase our wealth to pay for Universal Education and Universal Healthcare coupled with preventive measures (Nutritious Food and Exercises).

**3. What distinguishes your candidacy?**

I welcome us all to open up two things for All Americans under the banner of REPARATIONS! Teach how to fish!

1. Universal Education
2. Universal Healthcare coupled with preventive measures (Exercises & Good Food)!

Under this banner of reparations, All Americans will benefit. The nation will also benefit. Our nation will benefit from education by having perpetual supply of skilled, talented, and educated labor force along with a healthy labor force during this new civilization of "Nanotechnology!" Thus our country will be able to increase the wealth of our nation via savings in healthcare and also producing lifelong learners!!

**4. Pick any one issue. Expand on how you will address it.**

One issue I will try to stop is the Gerrymandering. Gerrymandering hurts our society and the economy. Citizens do not see the reason to participate because their votes become

obsolete because it does not mean anything. As policy makers, we have to promote equality and provide a sense of belonging for all. Equality for all provides the motivation to participate and build our nation.

**5. What are your ideas on curbing all the many area-wide shooting?**

No Guns, No Shooting. We need laws in place so criminals and people with psychological issues do not get access to guns. Background checks for all and a cooling off time for all applicants who wants a gun permit. The applicants should be required to submit a bullet used by their gun so it can be kept in the server so we are able to run a match to test any bullets that are used. It will be a bullet DNA bank to run test against all bullets found at any crime scene. Weapons of mass killings must be outlawed.

**6. Please give a 100 word summary on your background.**

I was born in Bangladesh. I migrated to America in 1979. I finished my Ph.D. from KU in 1995. In 1991, I went to China for my Ph.D. research. I taught a class on economics. In 1995, we moved to Atlanta, GA with my wife and daughter.

I am an entrepreneur and an author. “Chinese Entrepreneurs in the Economic Development of China” 1997. I worked in IBM Corporation and later taught at AIU. In 2002, I started a company named Malix I Technology and worked there till 2017. Presently I am the CEO of America A Care LLC, healthcare business!
