

NAME: Missy Moore
PARTY: Democratic
SEEKING: Public Service Commission District 3

1. Why are you seeking your office?

As Public Service Commissioner, I will advocate, negotiate and vote to lower the public's electric and gas rates. I vow to push for more private sector responsibility of our nuclear plants, including- Plant Vogtle. In an effort to reach environmentally responsible initiatives, I propose to implement a community led statewide Go Green Task Force. I will constantly review policies and additional safety measures including nuclear safety walk-thru transparency and will work to expand emergency funds for residents and small businesses and fight to expand financial assistance to our most vulnerable populations.

2. What do you expect to accomplish if elected?

My goal is to take the state of Georgia from one of the top 10 most expensive utility rate states to the "Best Practice" model for the country. I stand for all Georgians, and through research, plan to uncover all forms of energy in an effort to find the most effective and efficient energy sources for our state. As stated above, I believe a statewide Go Green Task Force will help generate and implement creative ideas for the benefit of our constituents.

3. What distinguishes your candidacy?

By creating and developing a Go Green Task Force, comprised of concerned constituent leaders, I know we can and will establish and continually improve our Best Practices. This affords Georgians from all across the state access to successful policies and procedures. Additionally, I am excited about the opportunities we can find in Solar and other alternative energies.

4. Pick any one issue. Expand on how you will address it.

The safety of Georgians is paramount. By researching and investigating all sources of energy, we will determine the safest and most cost effective source(s) for Georgia. Transparency is non-negotiable and I will engage both constituents and industry experts to reach the best decision and work to simplify the process. Plant Vogtle and Hatch play important roles in our energy in Georgia and we must keep them safe and clean.

5. What are your ideas on curbing all the many area-wide shooting?

As Public Service Commissioner, I support sustainable jobs and community engagement. It is my belief that a working society is a safer society. By engaging the community and encouraging livable wages and policies such as the First Offender Act; we can protect families, provide opportunity for citizens and create safer tomorrows.

6. Please give a 100 word summary on your background

Born in McAllen, Texas, my family arrived in Georgia in 1983. I am the first Hispanic woman to seek statewide office in Georgia. My passion has always been the civil rights movement. By getting involved as a young adult, I am honored today to call many of the civil rights leaders my friends.

My professional experience as a risk guidance expert, combined with my life long advocacy and volunteerism have prepared me to serve the people of Georgia.
