

NAME: Michael Corbin
PARTY: Republican
SEEKING: Congress, 7th District

1. Why are you seeking your office?

The love of my country and a personal calling from God. On December 20th, 2020, I filed my candidacy with the Federal Elections Committee. I thought about the current state of our nation with COVID, rioting, election integrity, and hate filled division fueled by the mass media. I wondered if this is what we stood for now, what will our nation look like and stand for when my children are grown? Will we have a country where faith, freedom and facts mean anything? I thought, what has my generation done? More importantly, what have you done? I am all in.

2. What do you expect to accomplish if elected?

Restore energy independence, secure our borders, stifle government spending, keep our schools out of political theatre, and protect Social Security and Medicare. I will honor my pledge for US Term Limits I officially signed to never serve more than three terms. I will persuade others to support US Term Limits for the House and Senate. For too long, career politicians have polluted American government. Those who do not support the Amendment have made a life as a career politician. I will call them out on a Quarterly basis to defend their stance. The lack of response will be deafening.

3. What distinguishes your candidacy?

I am not a carbon copy candidate. I am 41 years old and unlike many of my running mates, this is not a bucket list item for retirement. This is a serious endeavor, and I am taking the risk now. I know that we are more alike than different in this country. I am conservative but see the world differently. My wife is African American, my daughters, biracial. I see the people I love and the country I love, not color. As Republicans, we must see the big picture to win back voters and the election this November.

4. Pick any one issue. Expand on how you will address it.

Energy independence is vital to the sovereignty of our country. We harness the ability to produce oil and gas, yet consciously import from allies and enemies. This current posture is selfish and reckless. We will not be held hostage by ill-fated policies promoting energy dependence, to force renewable energy on all, without a short-term plan. This is a clear and present danger to national security. Until a well-defined short-term and long-term renewables plan is in place, I will introduce a bill certifying we remain a net positive consumer and exporter of oil and gas produced in the USA.

5. What are your ideas on curbing all the many area-wide shooting?

They can certainly be curtailed. We need tougher consequences for those who are guilty. If a fatality results, the minimum penalty is the death sentence. If no fatality results but a shooting occurs, the minimum penalty is life without parole. If only planning is demonstrated and action is dangerously close, those individuals should be sentenced to 20 years minimum. Furthermore, there should be an identity protected whistle blower program for those with credible leads regarding individuals who have made specific threats. This program would support the reporting of suspicious activity to geographically based task forces at the state and local level.

6. Please give a 100 word summary on your background.

I am Christian, proud husband and father of two, a graduate of Duluth High School, hold a bachelor's degree from The University of Georgia, in Political Science. My 17-year career in the communications industry, building and leading successful teams, demonstrates the trust others have in me. I am passionate about ending inflation, maintaining energy independence, keeping our schools out of political theatre, safely securing our borders, and eliminating racism. I have been a regular on national media programs, including Real America's Voice News, hosted by Dr. Gina Loudon, a close friend of Donald Trump, serving on his media advisory board.
