

NAME: Hai Cao

PARTY: Republican

SEEKING: House District 107

1. Why are you seeking your office?

The freedom of choice, the economics freedom, and the rules of law this ‘Land of the Braves’ have afforded me a successful transition from a poor political refugee escaped the North Vietnamese communists invaded the South in 1975 to a successful system engineer in Space Electronics industry. As State Representative, I will fight to preserve the freedom, opportunities in Georgia for younger generations as a form of ‘pay it forward’.

2. What do you expect to accomplish if elected?

As State Representative, I will work with other representatives to pass the two proposals aimed at fighting inflation for Georgians Gov. Kemp announced, one is to refund state income tax, \$250.00 per taxpayer, \$500.00 per couple. The other is to rebate homeowner property tax. The proposal stated that up to \$20,000 of a property’s value would be exempted. The average Georgian homeowner would save up to \$500 on their property taxes in 2023. Other important issues on my list are working on laws to reduce crimes, and to improve quality education including school choice for parents.

3. What distinguishes your candidacy?

Answer:

I am a self-motivated, goal-oriented person. Has succeeded despite major challenges.

I did not speak English when arrived in Seattle, Washington in 6/1975. I graduated from the University of Washington Mechanical Engineering in 1980, accepted offer to join General Electric. In 1982, I completed the GE Manufacturing Management Program and the advance degree of System Engineering at San Jose State University. Joined space electronics team of a space company that designed and built rocket engines for on-orbit satellites. Progressed to Senior Program Manager, responsible for multi-million-dollar space programs. I founded my company in 2018, CTH Consulting Services in Georgia.

4. Pick any one issue. Expand on how you will address it.

Quality of Education – Improve quality teaching and subject matter with goal measured by increase the number of high schools of quality Gwinnett County Public School rated >8 out of 10. Additionally, subjects like, race, transgender and sex should be left to parents.

5.What are your ideas on curbing all the many area-wide shooting?

I support electing district attorneys and judges who apply the laws in the book and not legislative from their benches. Secondly, law enforcements need support from everyone to allow them the confidence to do their jobs according to the laws without concern about pollical repercussion.

I believe stricter gun laws would not curb the many area-wide shooting because GUN itself does not kill anybody, but rather take away law-abiding citizens the ability to defend themselves as demonstrated by the shootings in Chicago, highest in the nation yet Illinois has the strictest gun law in the nation.

6.Please give a 100-word summary on your background.

On the boat to freedom, I escaped the North Vietnamese communists who invaded the South in 1975. I am an engineer with experience designed and built small rocket engines for on-orbit satellites. As Senior Program Manager, I was responsible for multi-million-dollar space programs. I founded CTH Consulting Services, based in Atlanta.

The Democrats ill-conceived “Green New Deal” that creates record high inflation in 40+ years in less than 2 years. As a state representative with experience in program management and analytical skills, I am confident I will be able to help pass the two tax relief proposals for Georgians.
